New HCPCS/CPT Codes

With the publication of the 2003 editions of Current Procedural Terminology (CPT-4) manual and HCPCS Level II manuals, a number of new codes were added to the Medicaid fee schedule. The changes are effective January 1, 2003.

Do not bill any new 2003 HCPCS or CPT codes for dates of service before 01/01/03, or you will receive a claim denial. Please refer to the updated fee schedule for new codes.

New J Codes

The following codes are valid only for dates of service 01/01/03 and up.

New 2003 J Codes				
J0287	J0880	J1815	J2916	J7350
J0288	J1051	J1817	J3315	J7633
J0289	J1094	J2324	J3487	J9010
J0592	J1564	J2501	J3590	
J0636	J1652	J2675	J7317	
J0637	J1756	J2788	J7342	

If you were previously billing a J code as an unlisted J code (for example J3490), please verify that a new J code does not exist. For example, use J0880 for Darbepoetin Alfa and J3487 for Zoledronic Acid instead of J3490 (unclassified drugs). Pay careful attention to the HCPCS description of the unit amounts when billing units in field 24g on the CMS 1500 form.
